Home Assignment <2.2>

Red Bus and Flipkart in Edge and Firefox Browser Instances (Week2.Day2)

Learning Objective:

- Learn how to automate basic navigation to two different websites (Red Bus and Flipkart) in two separate browser instances (Edge and Firefox) using Playwright.

Expected Completion Time:

- Best Case: 15 minutes
- Average Case: 20 minutes

Assignment Details:

Task:

Your task is to launch two separate browser instances using Playwright:

1. Load **Red Bus** in an **Edge** browser instance and verify the page title and URL.
2. Load **Flipkart** in a **Firefox** browser instance and verify the page title and URL.

Preconditions:

1. Use Playwright to launch **Edge** and **Firefox**.
2. Create two separate browser instances.
3. Use the following URLs:
   - **Red Bus**: https://www.redbus.in
   - **Flipkart**: https://www.flipkart.com

Requirements:

- **Red Bus** (Edge):
   - Load the home page and print the page title and current URL.
- **Flipkart** (Firefox):
   - Load the home page and print the page title and current URL.

Hints:

- Use `page.title()` to retrieve the page title.
- Use `page.url()` to retrieve the current page URL.

   Expected Outcome:

- Upon completion, you should be able to navigate two websites in two separate browser instances (Edge and Firefox), retrieve page information, and print the page titles and URLs.
